

# Decorative Acorn Globe Series

**RAY-LITE Industries, Inc.**

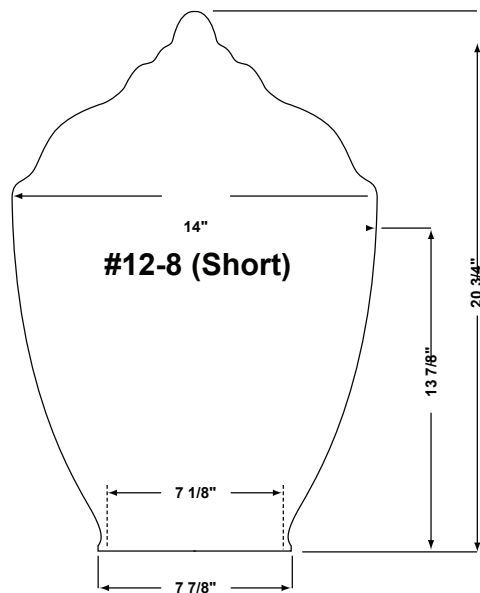

Simply Illuminating Your World Efficiently

## New 12-8 Short

The RAY-LITE ACORN decorative glass street lighting and architectural globe is the original post-top nostalgic design created in the 1930s, and is still produced using the same historic molds. The RAY-LITE 12-8 ACORN design initially set the standard for lighting globes in the WWII era. Now with a slightly smaller design we have improved uniformity and coefficient of utilization, enhancing the light source technology performance.

### DIMENSIONS:

### FEATURES
